VERSATILE POWER ANNOUNCES NEW WEBSITE

SEPTEMBER 1, 2011, CAMPBELL, CALIF. - - - Versatile Power, Inc. a technology leader in the design and manufacture of custom electronic subsystems announced their new, expanded Website: www.versatilepower.com. The new Website provides ease of use for visitors wanting to learn about the Company's broad offerings of custom design and manufacturing services for medical, semiconductor, ultrasonic, lighting, government lab, aerospace, military and industrial applications.

For customers seeking responsive, breakthrough designs for applications of RF, DC, ultrasonics and lasers, Versatile Power's new Website offers multiple quick links including: power supply and controller design solutions, highly successful case histories, management team biographies, leading-edge electronic subsystem disciplines, and the highest standards of quality control procedures including ISO 9001-2000 and 13485-2003.

Visitors to the new Website can also find sections on press activities, links to published articles demonstrating how Versatile Power's technological expertise enabled successful results in unique environments, a contact page which allows for scheduling meetings with a member of Versatile Power's team, and more.

Versatile Power, Inc., established in 2002, is a privately-owned company located in the heart of Silicon Valley. The Company specializes in custom design and manufacturing of products and subsystems, for original equipment manufacturers (OEMs), for use in RF, DC, ultrasonics and laser applications. For additional information contact: Versatile Power, Inc., 743 Camden Avenue, Campbell, California 95008 U.S.A., Phone: +1-408-341-4603, Fax: +1-408-341-4601, e-mail: sales@versatilepower.com, Web: www.versatilepower.com
