VERSATILE POWER ANNOUNCES SHAD SCHIDEL JOINS COMPANY AS MANAGER OF QUALITY

MARCH, 1, 2011, CAMPBELL, CALIF. - - - Versatile Power, Inc. a technology leader in the design and manufacture of custom electronic subsystems announced that Shad Schidel has joined the Company as Manager of Quality. Schidel brings more than 16 years of professional quality engineering to the Company.

Schidel's previous experience includes quality compliance engineering positions at Cepheid and over 14 years with Agilent Technologies (formerly HP). As an ASQ Certified Quality Engineer, he is intimately familiar with the requirements for ISO 13485 and 9001, CAPA (Corrective Action - Preventive Action), GMP (Good Manufacturing Practice) and QSR (Quality System Regulation). Schidel holds a Bachelor of Science degree in Molecular Biology from the University of California, San Diego.

Schidel has extensive knowledge in training others, process improvement, internal and external auditing, software validation, failure investigation and corrective action, DNA microarrays, French and Spanish languages, and customer education and interface.

"The addition of Shad Schidel to our team greatly enhances Versatile Power's broad offerings of custom design and manufacturing services for medical, semiconductor, ultrasonic, lighting, government lab, aerospace, military and industrial applications," commented Jerry Price, CEO of Versatile Power.

Versatile Power, Inc., established in 2002, is a privately-owned company located in the heart of Silicon Valley. The Company specializes in custom design and manufacturing of products and subsystems, for original equipment manufacturers (OEMs), for use in RF, DC, ultrasonics and laser applications.
